[SIES] INFORMATION FOR GRADUATION

From: 국제이공학부::Global Frontier College <gfceb@jbnu.ac.kr>

To: kobilov2001@bk.ru

Good afternoon, SIES student

Today, we'd like to give you important information for graduation.

This email will be really helpful for your academic life.
So please read carefully.

For your graduation successfully, there are some conditions you have to consider.

At first, you have to take enough credits each areas the University and the department required from.

As you know, **you should take at least 130 credits in total.**

130 credits are consisted with liberal arts, major and etc.

Also, **you have to choose Intensive major course or double major.**

*Intensive major means you have to take more selections of major courses which we called it E.

*Double major if you want to choose, you can apply the major which you have interest before starting semester (there is the period for applying double major and minor major), but you have to check their condition for double major application before you apply.

(You don't need to inform your choice. it's up to you. But it is necessary for graduation)

We are giving you some example for your understanding.

For example,

EXAMPLE 01) If you choose intensive course for graduation -

You will get 63 credits in major courses.

(R: 18, E: 45)

Followed rightly with our department's guideline if you let us course registration instead of you, you get 37 credits in liberal arts.

Now it just 100 credits it means you need more 30 credits for graduation.

In that case, you might be take all of major courses in our department.

So you should take 30 credits in liberal arts or General area (General area means the other major course which you took it.)

EXAMPLE 02) if you choose double major which you will get two diploma-

You can take 42 credits in our major and you have to take 42-45 credits from your double major.

it will be 84 or 87 credits.

Also, you get 37 credits in liberal arts followed by our instruction.

Now it just 121 credits so you have to take 9 credits more from liberal arts or major courses or general area.

EXAMPLE 03) if you choose minor major. you have to take intensive course together.

You can take 63 credits in our major which are minimum credits from our major's courses.

And you have to take 21-24 credits from your minor major.

Now it will be 84 or 87 credits.

Also, you get 37 credits in liberal arts followed by our instruction.

It means you have to take 6 or 9 credits more from liberal arts or major.

All of this courses, you have to take them in 18 credits per semester.

Additionally, there is limit in the liberal arts credit's recognition.

(At least 37 credits to Maximum 43 credits. if you take more than 43, your extra credits are not recognized.)

Of course, it should be finished for 4 years in JBNU.

It will be required to think and take the courses wisely.

That's why you have to take at least 15 credits per semester.

It will be really hard for taking enough credits if you just take lower than 15.

We suggest that you should take 18 credits per semester.

You should make the best use of your 18 credits which you can take per semester.

Most of all,

You have to manage your credits and handle your curriculum by yourself.

This is your studying.

You can check your credits in OASIS. 5-5.

We will send new version of OASIS manual after adding the page explanation how to you read in that information in OASIS.

We really hope you think and take action wisely for getting diploma from JBNU successfully.

For your understadning >

<https://sies.jbnu.ac.kr/sies/15000/subview.do>

This is our department's website about the graduation.

There are information about guideline and credits information.

We recommend strongly you have to check it.

Thanks
